

Charge for 3D Aspect of Your Mammogram

As of January 1, 2017, the State of Connecticut has mandated that the 3D portion of your mammogram be a "covered" service. This means that your insurance company must accept the charge as covered. However, if your deductible has not been met, some insurance plans may expect us to bill you the balance for the 3D portion of your mammogram. The fee is less than \$80, depending on which plan you have.

If you have met your deductible, don't have a deductible, or your plan covers the 3D service, then you pay nothing out of pocket. Please keep in mind the non-3D aspect of your screening mammogram will still be paid by your insurance company.

If you have further questions please contact Sharon at 203-596-9793 extension 213.
